Title	Digital Narratives
Kennung	
Module Coordination	Gilbert Shang Ndi
ECTS	5
Exam Information	Portfolio (in the form of two short essays, E 1/2 + E 1/2)
Learning Contents	This seminar focuses on the question of textuality in the age of new information and communication technologies and their impact on the conception, development, dissemination and appropriation of literary texts. It will examine the extent to which these new media and virtual tools have both challenged and reinvigorated the notion/practice of textuality in the field of African Literature. Amongst other things, the course will focus on notions such as cyber-orality, hypertextuality, viral text, interactive text, co-authorship, virtual community, and so on. We will examine the most salient cases of these new writing practices, while revisiting certain precursory texts which, although considered as normative texts, already heralded the new flexions which today characterise digital textuality.
Learning Objectives	At the end of the course, students will be able to understand the genealogy of digital literature, to trace the antecedents of the digital in the "New Novel", to understand formal transformations that texts undergo in virtual forms from conception to reception; and to problematise notions of authorship and readership with regard to the digital.
